

How to Request for Street Lights

1. Submit the request with the general location to:
Department of Public Works (DPW)
Attention Ernest Slaughter
141 Pryor St, Suite 6001
Atlanta, GA 30303
2. DPW will review the request with the servicing power company for that area to determine the legitimacy of the request. Typically the distance to existing lights, candle light projections, sight safety, etc. are considered.
3. If the request is determined to be legitimate, the power company will advise DPW if there will be a charge from the power company for the installation of the street light. Typically if the street light can be installed on an existing pole there is no charge by the power company for the installation.
4. If there is a cost involved for the installation of the street light, this cost is typically born by the requester of the street light.
5. After the funds have been secured for the installation of the street light, DPW will submit the request to the BOC for approval as part of the traffic recommendations report.
6. Projected timeline for completion of project is typically 90-180 days after BOC approval.
7. Power consumption cost is typically paid for by the County.
